Projects

Project: Career Guidance Website for Rural Students

- Developed a page where students can find useful information regarding the available streams.
- Interacted and helped rural students (govt. students), the website contains all the available streams after 10th, 12th, and graduation. Also mentioned entrance exams for renowned institutions for the 12th graders.
- Hosted the website on GitHub pages: Click Here.

Project: Shoe Mart Billing System (C Language)

- Designed a menu-driven program to handle product selection, inventory, and billing.
- Implemented core data structures for efficient data storage and retrieval.
- Improved user interaction through clear menu options and automated calculations.

Project: Front-End Development Practice Projects

- Developed multiple small-scale applications, including Tic-Tac-Toe, a food delivery landing page, a survey form, and a college portal shortcut.
- Strengthened UI/UX and responsive design skills by experimenting with layouts and interactivity.
- Gained practical experience in structuring and styling web pages.
